McLAREN FETE DRAWS BIG CROWD SUNDAY

OVER 12,000 PEOPLE ATTENDED
THE BIG DOINGS AT TAN-
FORAN LAST SUNDAY

10,000 FOR McCL. LAKE

People of the Community Did Nobly
In Their Turn Out for the
Good Cause

The plan to build a beautiful lake in Golden Gate park in honor of John McLaren, veteran superintendent of the parks of San Francisco, was assured of success last Sunday.

More than \$10,000 was raised for the McLaren fund at the Jackie Coogan circus fete held last Sunday at Tanforan race track.

More than 12,000 persons witnessed the triumph for 80-year-old John McLaren and diminutive John Coogan and each shared alike in the honors of the day. One paid tribute to the other, and the crowd paid tribute to both.

Horse races, clown acts, the finish of a 100-mile bicycle race and the filming of portions of Jackies next picture, "Johnnie Get Your Hair Cut," were also features.

Roy D'Artenay of Santa Cruz won the bicycle race and broke a world's record for the distance in five hours 3 minutes 6 seconds. Rob Bertie of San Jose was second.

The race started at San Jose and traversed the La Honda-Half Moon Bay region, thence to Tanforan.

Members of the park commission and scores of peninsula society leaders were in attendance.

NOT "MISSING" BUT ABSENT-DRUNK AND IN JAIL

The great Cordero mystery, which has been baffling the best minds of Salada Beach for a week, was solved Monday.

Constable S. A. Landini of Colma and members of the San Francisco police department cleared it up. They discovered that George Cordero, a Salada Beach ranch-hand, had not been abducted and murdered, but was reported to be in jail, drunk.

Cordero visited San Francisco a week ago. He was seen Sunday night in front of the ranch where he works by Fred Davis. Cordero stepped out of an automobile, thanked the driver and started to walk away. The driver demanded \$10, which Cordero declined to pay, and the driver threw Cordero back into the car and drove away.

That was the last seen of Cordero for six days. The beach was searched, ravines were explored, highways were guarded, and there was much distress. It was feared that Cordero had been done away with.

But yesterday he returned to the ranch, after Landini had made a trip to San Francisco and found that the auto driver, owner of a lively car, had caused his arrest. Cordero had accepted the ride to Salada Beach, he explained, under the impression that the lively man was offering him a free ride. This droll notion caused much amusement.

TICKETS SELL FAST FOR P. T. A. THEATER PARTY OCTOBER 5

"The ticket sale for the P. T. A. State Theater party, October 5, is working out splendidly," said Mrs. Taggart, president of the P. T. A. last Thursday.

Jefferson high school has taken 750 tickets to sell. The P. T. A. is also being assisted by the Sheridan P. T. A. of Ocean View, and the Farragut P. T. A. of Ingleside, who have volunteered to help sell some tickets.

The program will consist of a two reel comedy, a single reel, and an eight reel picture, "The Still Alarm," featuring Helene Chadwick, William Russell, and Edna Marine. There will also be a vaudeville act put on by the high school.

The first show will begin soon after 6:30 if the crowd is large enough.

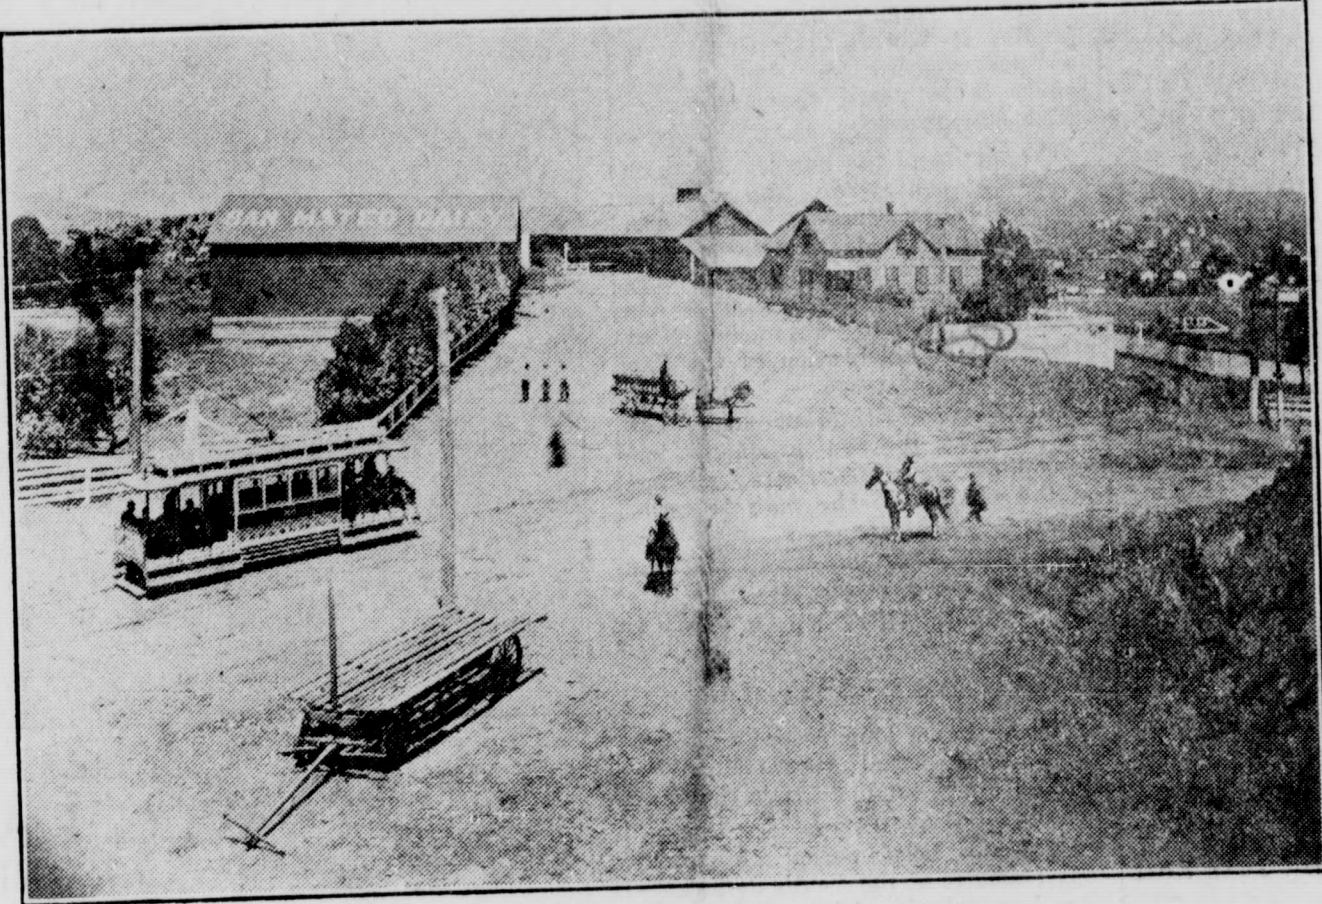

Several prizes have been donated to the P. T. A. for that evening, and these prizes will be given out promptly at 9 o'clock.

All students selling the most tickets will receive prizes, consisting of free passes to the State Theater.

Mr. and Mrs. Robert Wall and the Misses Jessie and Margie O'Connor motored to San Bruno last Sunday where they enjoyed the football game staged between Colma and San Bruno athletic clubs.

Just what IS a BOOSTER? Many of us have come to think that "boosting" means inflation. Some folks imagine that when they are asked to boost a thing, that their truth-telling faculties are to be taxed to the utmost, and, under that impression, are led into flights of exaggeration like the following:

"Did you know that Harry made \$50,000 in Washington last week? SOME DEAL, believe me," said Abe. "Don't believe it," said Joe. Abe called over to his friend George—"Wasn't it true that Harry made \$50,000 in Washington last week?" "Sure it's true," said George, "only its wrong in four places: it wasn't Washington, it was Denver; it wasn't a week, it was a year; it wasn't \$50,000, it was \$5,000; and he didn't make it, he lost it."

Such out-of-proportion statements are more of a detriment to a cause than a help, and enthusiasm, while necessary as an adjunct to the success of an undertaking, should find enough to recommend the object in the salient points of the thing itself.

For instance—take the boosting of Daly City itself. Get the idea right—BOOSTING—not boasting. The best boost that can be found for the district is the accompanying illustration, which will undoubtedly cause a smile

among the older residents, of whom there are many who have found Daly City, as the slogan goes: "a good place to live."

When we look back to the days when this picture was taken, and think of the time when Daly City was referred to in vaudeville houses as some place remote from civilization, when our equipment was meagre, and our progress slow, it will serve to demonstrate, looking at the Daly City of today, what can be accomplished by the RIGHT KIND of boosting; the kind that has impelled the people to keep plugging away for improvements; the kind that has brought new businesses, new schools, new, splendid homes, and many people to the district. The growth has been slow in the past, perhaps, but the future is assured, and all that is needed now to put Daly City "over the top" one hundred per cent is for its people to tell it out to all and sundry that WE HAVE—"A GOOD PLACE TO LIVE." Good streets bring homes, homes bring schools, schools bring business districts, and business districts bring payrolls, and THEN, and only then, can your community be said to be on a substantial, progressive footing. Booms, such as occur from time to time, in various parts

BIDS RECEIVED FOR GRADING OF BOTTLENECK

STRETCH OF ROAD IN VICINITY
OF CEMETERIES WILL ADD
TO LOCALITY'S BEAUTY

BIG IMPROVEMENT

When Traffic is Heavy the Going is
Very Slow—This Will Be
Eliminated

Bids were received Monday by the California Highway Commission for grading 1.58 miles near Cypress Lawn cemetery, San Mateo County, the last "bottle neck" on the Peninsula route south of San Francisco. The Kaiser Paving Company of Oakland was the lowest of six bidders with an offer of \$99,299.80 against an engineer's estimate of \$118,228.50.

Rights of ways in excess of 100 feet in width, partly on new alignment to eliminate curvature, have been secured by the commission for the cooperative project which is being aided by the City and County of San Francisco and the County of San Mateo.

Plans for paving have been completed and bids will be asked on this feature of the work as soon as grading progresses to a point where the placing of pavement may be commenced. The Cypress lawn project will complete the widening and reconstruction of the Peninsula highway through San Mateo County, initiated by the present commission in 1923.

SOUTH AFRICA BUYS MANY CARS IN THE UNITED STATES

There were 11,170 automobiles sold in South Africa during the first six months of this year, the great majority of which were imported, according to a Department of Commerce report. Sales of trucks below \$500 in value increased 80 per cent over last year.

HARD TO RUN IT STILL, WHEN THERE ARE 'BRICKS' AROUND

Dave Hilton, 26 a truckman, was surprised at his home in Fair Oaks when a posse from the office of Sheriff T. C. McGovern swooped down upon him and found him operating a 250 gallon still.

Over 600 gallons of mash were found along with a quantity of other equipment used in the manufacture of liquor. Hilton is in the county jail charged with violation of the Wright Act.

AUTO COLLIDES WITH TRUCK; MAN AND WIFE IN HOSPITAL

One man is not expected to live, and a woman is in a critical condition, as a result of an automobile accident at Redwood City early Tuesday morning. Both are confined in the Community hospital at Beresford. They are:

Dell Driscoll, 37 Hamilton street San Francisco, unconscious from a fractured skull and possible internal injuries.

Regina Lyndell, 3434 Sixteenth street, San Francisco, fractured arm and numerous lacerations about the body.

The couple were riding in a machine driven by Jonnie Mullins of Fourteenth avenue and Howard street, San Francisco, when it collided with a truck driven by W. L. Foster of Gilroy. Mullins automobile overturned following the collision, and Driscoll and the Lyndell woman were hurled to the pavement. They were picked up by J. A. Scott of Redwood City and rushed to the hospital.

Immediately following the wreck Mullins was missed and, according to the Redwood City police report, he has not been located.

DRIVER HELD

Struck by an automobile driven by Louis Foir, Sonoma County, while standing on a safety zone at Seventh and Market street, Julius Fangel, 70 Brussels street, was treated at the Central Emergency Hospital Sunday afternoon for severe lacerations of the scalp.

Fior was arrested and booked at the Southern police station for reckless driving.

\$66,000, MONTH'S BUILDING PERMITS AND NO BOOM

JUST A GOOD, HEALTHY NATURAL,
STEADY GROWTH FOR
DALY CITY

MUCH BUILDING NOW

According to the Records in the City
Clerk's Office City Is Making Rapid
Progress—Look It Over

A local item was turned in to THE RECORD office today for publication and one of the representatives of this paper called on the city clerk to ascertain the actual amount in dollars and cents. He was informed that \$60,000 and a little over in building permits had been issued this far for September. The list below verifies the statement, giving the names of the builders:

B. C. Ross reports the following building permits for the month of September, to date A. Paper 1137 Hanover, alterations; A. Schmid, 90 Park View, 5-rooms and garage; M. White, 50 Theta, alteration; B. Melano, 172 Templeton, garage; B. Melano, 1017 Templeton, garage; E. A. Janssen, 209 Oliver, 5 rooms and garage; E. A. Janssen, 217 Oliver, 5-rooms and garage; E. A. Janssen, 223 Oliver, 5 rooms and garage; M. H. Fugina, 109 Winchester, 5 rooms and garage; G. Fazio, 345 Winchester, garage; R. Mullin, 298 West Lake, garage alteration; Horace Fellows, 172 San Diego, 4-rooms and garage; Wm. Lust, 256 Los Olivos, alterations; B. Young, 23 Willits, 4 rooms and garage. A. J. Dalton, 518 Bellevue, 5-rooms and garage; J. Gowland, 382 Willits, garage; Fealin and Budalky, 599 Templeton, addition; J. Barsky and Cairns, 132 Los Olivos, 1-room, addition and raising house; Wm. Fell, 148 Santa Cruz, garage building; Chas. Gust, 167 San Diego, 4 rooms and garage.

80-YEAR-OLD SAN MATEOAN MISSING FROM HIS HOME

One of San Mateo's oldest residents, David Collier, 80 years old is mysteriously missing from his home in that city. Collier, who had lived in San Mateo for more than 30 years, disappeared last Saturday, and has not been heard of since. The police of San Mateo and Redwood City have instituted a search for him.

Philadelphia averages approximately 65,000 Long Distance telephone calls per day.

NOTORIOUS S. F. CHARACTER SHOT NEAR COLMA

Apparently the victims of gunmen who shot them and then threw them from a speeding automobile, Clyde Hilliard, notorious character of the San Francisco underworld, was found shot to death on the Skyline Boulevard near Colma early Monday and Miss Billie Wend of Oakland, his companion, was found wandering in a blind daze with a bullet wound in her head.

Hilliard's body, with a bullet through his brain, was found near the South Side ranch on the lonely mountain road shortly after daybreak by a rancher and his wife.

Nearly half a mile from the body, the girl was discovered, covered with blood from her wound, attempting to feebly climb up an embankment. She collapsed and was taken to the South San Francisco hospital, where she was reported hovering between life and death.

Constable S. A. Landini of Colma and Deputy Coroner Luella Pepper of W. C. Lasswell undertaking parlors Daly City took charge of the investigation. The first clues toward identification of Hilliard were the initials "C. H." on a belt buckle and the inscription, "Irene to Clyde," on a gold watch.

Hilliard was identified as one of the men mixed up in a murder which occurred on Green street in San Francisco a short time ago and at the time of his death he was at liberty on \$200 cash bail following an early morning fight in a San Francisco apartment house.

According to the San Francisco (Continued on Page 2, Column 3)

FOUR INJURED IN AUTO WRECK MENLO PARK

IONE REESE IS REPORTED DYING
FROM INJURIES
RECEIVED

MACHINE OVERTURNS

Automobile Turns Turtle When the
Driver, B. Mafchen is
Rounding Curve

Four persons were injured one perhaps fatally, when the automobile in which they were riding skidded and overturned on a turn at Santa Cruz avenue in Menlo Park Sunday night.

Ione Reese was reported dying from internal and cranial injuries. She was pinned beneath the car. A. C. McCloud, driver and B. Mafchen and Joe Saratte received bruises. All are employees on the Burton estate in La Honda. They were taken to the Palo Alto hospital.

WOODROW WILSON P. T. A. HOLD INTER- ESTING MEETING

Woodrow-Wilson-Vista Grande P. T. A. held the second meeting of the new school year last Tuesday, Mrs. Junker presiding. It was reported from the Federation meeting held at Belmont, Sept. 17, that \$39.00 was raised towards the Students Aid Fund, and that more was needed. Mrs. Junker also reported that a banner was to be given to the P. T. A. for the largest increase in membership this year. The regular monthly whist will be held at the usual time, the second Tuesday.

The last afternoon whist netted \$9.60. An evening whist will also be held Oct. 21, Mrs. McIsaac as chairman. Tentative plans were made to have a luncheon election day. Further particulars to be given later.

F. Bentley
Publicity Chairman.

Mr. and Mrs. H. Fellows entertained the following guests at a dinner held Sunday at their home. Dr. and Mrs. Norwall Dr. and Mrs. Callen Mr. and Mrs. L. Lombard, Mr. and Mrs. J. McCann of Palo Alto, Mrs. Soubre, Mrs. R. Fellows and Dr. Rankin.

GENE TUNNEY DEFEATS CHAMP JACK DEMPSEY

IN A POURING RAIN AT FINISH
CROWDS TAKE PUNISH-
MENT WITH JACK

DEMPSEY FAVORITE 3-1

Upsetting all the Dope That Had Been
Spread Since Signing of Articles
Tunney is Deservedly Champ.

Gene Tunney Wins! These were the three words flashed over the wires and through the air last night that meant the loss of fortunes and the making of them. 132,000 humans sat in the rain and watched him do it, paying for the privilege of doing so close to \$2,000,000. The fight was Tunney's in all but two of the ten-round contest. Tunney won by a decision rendered by two judges.

Gene Tunney, the Fighting Marine, is the new heavyweight champion of the world. He dethroned Jack Dempsey, king for the last seven years, last night, by smashing his way to decisive victory in a 10-round match that went the limit and furnished one of the greatest upsets in boxing history.

MAY CLOSE PLACE OF BUSINESS FOR —SELLING HOOTCH

Abatement proceedings against an alleged bootlegging establishment at Millbrae, known as Dave Miller's place, were filed in the Superior court at Redwood City by District Attorney Franklin Swart.

The complaint names Florence and Norman Castleton as defendants and is based upon purchase of liquor alleged to have been made at the establishment last July. The proceedings seek to close the establishment for a year under provisions of the Volstead act, the district attorney said.

CONTRAST!

(Continued from Page One)

of the country (particularly of late in Florida) have no foundation, and do not make for any degree of permanent prosperity.

Remember, folks, San Francisco is on a peninsula, and there is ABSOLUTELY NO OTHER PLACE FOR GROWTH TO COME EXCEPT THROUGH DALY CITY. We know it, but we have to let the other fellow know it, too. We need an Improvement Club; we should have a Boosters' Club; we ought to get behind these people who are earnestly endeavoring to bring the better types of homes, businesses, schools, and people out here. We should have a block of office buildings for our business and professional men. These things are only accomplished when the residents of a district get together and present their ideas. How do you suppose other districts in San Francisco have put their projects over? Not by sitting at home, waiting for "George" to do it!

There are so MANY points in favor of Daly City to talk about! WE do not have to haul loam into our gardens from other places to make soil as they do in so many high-priced homes in Richmond and Sunset. We do not have to agitate for street improvements. We have absolutely the finest water imaginable; our street work has been performed, thanks to these splendid people who got behind the project, with an eye to both view and general landscape value, and substantiality; no unsightly churning up of sidewalks every time a new home is built, due to the forethought which put the sewer, water and gas mains into each lot. We have no undesirable element, little or no crime, owing to the watchful care of our peace officers, who are also to be highly commended for their regulation of traffic, vehicular accidents in Daly City being few and far between.

Our street car facilities are better than any section of San Francisco, barring none. We have four car lines, and fast headway, which is continually being improved as districts build up.

Our next agitation should be for the bus line which is in operation through the Crocker, Amazon and Excelsior districts to be produced as far as Daly City down to Niantic Street. If this can be accomplished, properties will be worth tremendously more, and the bus line will be the forerunner of a car service on our cross streets. These things can only be put over by REALLY TALKING UP OUR WORTHWHILENESS IN A BODY. At the time of incorporation, Daly City had in the neighborhood of 2,500 people. We have at the present time approximately 7,500. Let's get together and double that number in the next three years. Let's form a Boosters' Club that WILL BOOST!

POSSIBLE ONE MORE
WILL HANG IN CALIF.

Frederick David Galloway, 24, the "ukelele murderer" was found guilty of first degree murder in the verdict returned by the jury at the close of his trial late Wednesday afternoon.

Galloway will be condemned to the gallows when he appears for sentence Saturday morning, according to the district attorney's office, for the jury's verdict was without recommendation, which makes it mandatory for the judge to impose the death penalty. It will be the first death sentence imposed in Santa Clara county in 20 years, the prosecutor's office announced.

The victim of the murder, to which Galloway confessed, was Andrew Pashute, 23, an itinerant laborer, who Galloway beat to death with an automobile crank on the morning of May 23, while the two were riding to Los Angeles in Pashute's automobile after attending the celebration of the San Jose festival of roses.

Galloway, an itinerant actor, has whiled away the tedium of his imprisonment awaiting trial by playing on the ukelele of the man he murdered.

NOTORIOUS S. F. CHARACTERS
SHOT NEAR COLMA

(Continued from Page One)

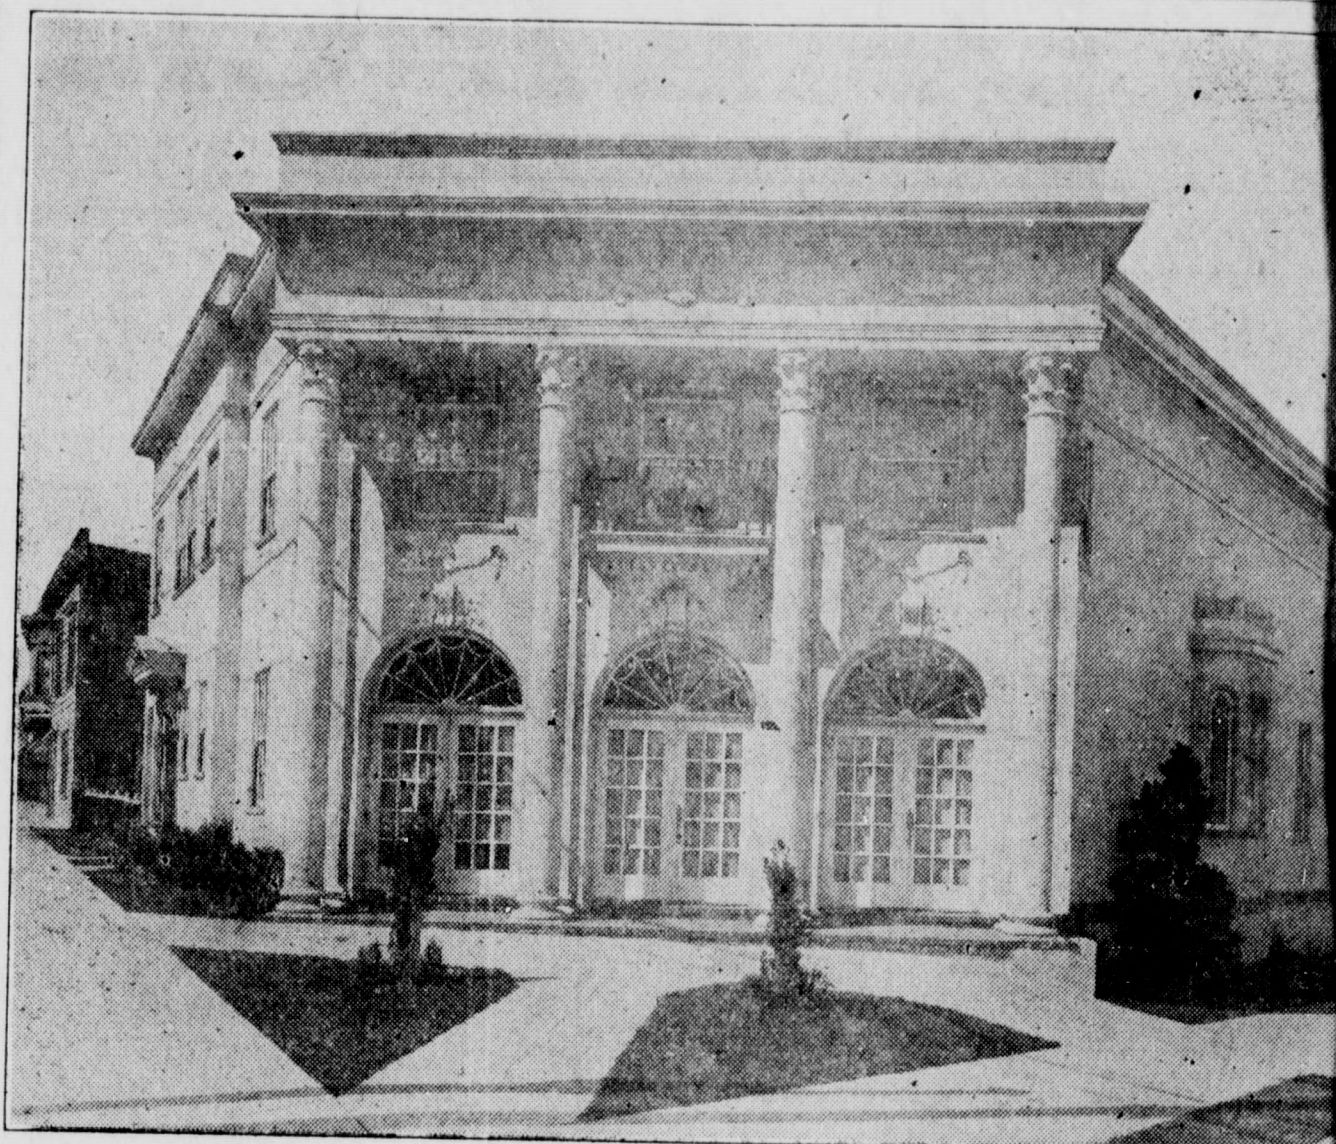

police, he has a long record of petty crime and several times narrowly escaped direct implication in murders and shooting scrapes.

During a brief period of partial consciousness at the South San Francisco hospital, the girl gave the three names of Billie Wend, Billie Burns and Bessie Burns. She whispered that she lived in Oakland, that she had a mother in Sacramento. As she was being questioned on the shooting she suddenly lapsed into unconsciousness.

Constable Landini, Undersheriff P. J. Larrecou and detectives from the San Francisco police department are laying the groundwork for the tracing down of every possible clue toward lifting the shroud of mystery from the tragedy. Hilliard was 26 years of age and his girl companion 24.

The body of the dead man was taken to the undertaking parlors of W. C. Lasswell of Daly City where the funeral arrangements will be made.

The funeral services were held on Thursday afternoon from the new Mortuary Chapel of the W. C. Lasswell & Co. Interment took place at Cypress Lawn cemetery.

WORLD WAR VETERANS
BENEFITTED

California enjoys the distinction of operative legislation for its veterans having enacted a unique piece of co-operative legislation for its veterans that has proved in actual practice to be the most economically sound measure for ex-soldiers ever devised in the State, or Country. The finest endorsement of Proposition No. 1 on November ballot, which provides an additional \$20,000,000 to finance homes and farms for veterans without cost to the taxpayer's, is the splendid record made by the Veterans, Welfare Board in the administration of the original \$10,000,000 appropriated in 1922.

The figures taken from a recent report of the Welfare Board show that more than \$5,000,000 were saved to veterans by simply using the credit of the State to enable the veterans to benefit by the buying power of the State to enable the veterans by simply using the credit of the State to enable the veteran to benefit by the buying power of cash and by obtaining for him a 5 per cent rate rather than the usual 7 per cent. Every dollar advanced by the State and interest on the entire \$10,000,000 is being paid back by the veterans but in the process of payment, he is saving practically 50 per cent of the amount he would be required to pay if he bought his home or farm on the usual time payment plan.

Up to June 1, 1926, 2200 veterans not one in a hundred of whom had previously owned real property, had purchased property with an aggregate value of \$10,000,000. Without the credit of the State, these identical homes and farms would have cost the veterans at least \$15,370,000.00.

In other words, the State without cost to the taxpayers has saved our veterans more than \$5,000,000 and at the same time has taken a remarkable step in building up better citizenship which always comes with home ownership.

With only 2200 of the 15,000 applicants for the benefits of this bill accommodated by the original \$10,000,000 bond issue it is imperative for our State to carry on the good work started and to see that every deserving veteran be given the privilege of owning a home or farm with state aid.

The additional \$20,000,000 bond issue which appears on the November ballot as deserving of the support of every California voter.

COMMITTEES FORM
TO DEFEAT L. A.
HIGHWAY MEASURE

Two committees composed of highway leaders from all parts of California will direct the campaign now under way to secure passage of the one-cent gasoline tax measure for financing completion of the state highway system and to defeat the Los Angeles highway measure, No. 8, on the November ballot.

The first of these committees was organized in San Francisco last week and the second will be organized at a meeting to be held in San Diego during the coming week, according to a joint announcement made by Charles W. Heyer, president of the County Supervisors Association of California, and H. J. Brunnier, chairman of the Highways Committee of the California State Automobile Association. These two organizations, which are sponsoring the gasoline tax measures are also carrying on an active campaign against the Los Angeles measure, the defeat of which is declared to be even paramount to passage of the gasoline tax measure.

A "Correct" Likeness of Washington

This heroic statue of the commander-in-chief of the first armies of the United States was made for the city of Portland, Oregon, though not yet delivered there by the artist. The western municipality has loaned it to the Sesqui-Centennial International Exposition, opening in Philadelphia June 1, and continuing until December 1, to celebrate 150 years of American independence. At the foot of the sculpture is shown Pompeio Copplini, the sculptor Dr. Henry Waldo Poe, of Portland, declares the face to be the most correct likeness of Washington ever modeled.

At the meeting to be held in San Diego, highway leaders from all sections of Southern California will be organized into a committee to direct the two-fold campaign to prevent state unity and finance completion of the state highway system on an equitable and adequate basis.

Highway leaders of Northern and central California were organized last week and appointed an executive committee through which the larger group will function in this section of the state. This committee will work jointly with the executive committee to be appointed in Southern California in carrying on a state-wide campaign to pass the gasoline tax, Amendment No. 4, and to defeat the Los Angeles measure, Amendment No. 8.

Members of the Northern and Central California executive committee are: H. J. Brunnier, chairman Highways Committee, California State Automobile Association, chairman; Charles W. Heyer, president County Supervisors Association of California, vice-chairman; Carl Lamus, chairman Highways Committee, Sacramento Chamber of Commerce.

EFFICIENCY KEYNOTE
OF TELEPHONE CO.

One of the problems confronting the chief operator in a large telephone exchange is the placing of the operating force at the switchboard with reference to experience and ability and so grouping the operators at these positions as to obtain the best teamwork and to meet the distribution of traffic along the board.

This is accomplished in the Bell System by the use of a sort of chart which shows graphically the positions to be covered each hour of the day, and the times at which relief and lunch periods are to be given. The chief operator lays out her force to accomplish the desired results on a form which gives her the picture of the arrangement of the force, showing all positions covered, the operator assigned to each position and the moves that are made during the day by the operating forces when relieving for the regular relief or lunch periods, or when taking the places of others whose tours of work are completed.

A British peer of Birmingham paid an actress \$25,000 to call off a breach of promise suit against his son.

Important Announcement
TRANSCONTINENTAL
TELEPHONE SERVICE
CHANGES

Effective October 1, 1926

Reduction in Transcontinental Rates

Substantial reductions will be made in Transcontinental rates, for example, the day station-to-station rate between Los Angeles and Chicago will be \$7.70 instead of \$11.10; between Los Angeles and New York \$10.75 instead of \$15.65; between San Francisco and Chicago \$8.25 instead of \$11.90; between San Francisco and New York \$11.30 instead of \$16.50.

Reversed Charges on Transcontinental Station-to-Station Calls

Heretofore the reversal of charges has been available only on person-to-person calls. As a further convenience to the public this privilege will be extended to Transcontinental station-to-station calls.

Longer Reduced Rate Period on Transcontinental Calls

Reduced rate hours for Transcontinental station-to-station calls will begin at 7 P. M. instead of 8:30 P. M., as formerly. Between 7 and 8:30 P. M. the discount will be approximately 25 per cent. of the Transcontinental day station-to-station rates; from 8:30 P. M. to 4:30 A. M., the discount will be about 50 per cent. of the day rates. Because of the unsatisfactory service conditions which it brought about, the existing midnight discount will be discontinued on Transcontinental calls.

The net result of these rate changes will be a saving to the telephone users of the United States of approximately \$3,000,000 a year. The service changes are made in the interests of public convenience, to relieve the burden now imposed by the congestion of business at midnight and to furnish still better service over the Transcontinental lines of the Bell System.

DALY CITY RECORD
\$2.00 PER YEAR
SUBSCRIBE TODAY!

CALIFORNIA NEWS BRIEFS

Fifty tons of apples on a six-acre orchard is the record for L. C. Hallwager of the Woodlake district, who has started harvest on his Delicious variety. The trees are 10 years old, and this year have more fruit than at any time since they came into bearing. The fruit is all of fine large quality and most of the trees bending low with the apples. On one limb was counted sixty apples, each weighing a pound or more. Two of the apples which Hallwager had picked out for the Tulare county fair and which fell to the ground, measured over 16 inches around and weigh 3½ pounds.

The state railroad commission announced granting of a certificate to the Sierra and San Francisco Power company and the Pacific Gas and Electric company, lessee, authorizing enlargement of the Spring Gap power plant of the former company on the south fork of the Stanislaus river at a cost of \$1,950,000. Construction of a new rock filled dam four miles above Strawberry Reservoir, creating what will be known as the Big Dam Reservoir, is proposed. The plant's output would be increased to 5,000,000 kilowatt hours a year.

A course in horsemanship and the care of horses has been made a part of the agricultural course of the Stockton high school this year, according to J. Mitchell Lewis, head of the agricultural department. Through an arrangement with Lieutenant Colonel Otto Sandman, of the Stockton national guard units, thirty horses of the artillery units will be used by the high school for instruction. The course will include at least one hour of riding each week together with daily theoretical instruction.

A. G. Smith, whose farm is east of Laton on the southern Fresno county line, reports that his six-acre orchard of Elberta peaches yielded thirty-four tons of fruit this year. He marketed twenty-eight tons of fresh fruit and nearly seven tons were dried. In addition, a crop of canning beets grown between the rows of trees is reported to have brought him \$300. The Laton district lies along the Kings river on rich, productive bottomland and produces large crops in both Fresno and Kings counties.

Valued at \$500,000, Kern county will have marketed a hay crop approximating 41,000 tons by the end of the year it is estimated from figures compiled by E. R. Long, who, with Cross brothers and E. H. Loveland, handles the consignments covering the larger volume of the harvest. On a low market of \$12 a ton, 25,000 tons, filling 2,083 cars, and valued at \$325,000, have been shipped from the county since January 1. The produce was bought by southern California dealers.

"Many of our orchards were merely plans eight years ago," say the fruit growers of the Planada district near Merced, "and now we command good prices in New York and Chicago markets." The fig trees of the Brainerd ranch, yielding three tons to twenty-seven trees, are good examples of eight-year-olds earning fancy prices for fancy fruit. The Kadotas, as big as plums and a cross between a gold and a Nile green color, are at present the most popular on the market.

Among the new industries of the San Gabriel valley is the dehydration of orange peel, mainly used for stock and poultry feed. A plant devoted to this industry is under construction in San Gabriel by the California Citrus Products corporation. The capacity of the new plant will be about five tons of the product a day. This is sold under contract to Texas buyers, it is declared. After dehydration, the peel is ground into a fine meal ready for mixing into balanced stock rations.

William Jones, colored, Marysville, paid a fine of \$10 in police court recently on a charge of fighting and then dug into the waste basket in the police station for two Chinese lottery tickets that netted him \$18. "I sure has my rabbit foot with me this time," Jones told the officers, as he hastened out to cash the tickets, which he learned, during his all day incarceration, were winners. The tickets were taken from him at his arrest and dumped into the waste basket.

Hit as hard as you like, but speak softly. This is the warning sent out by the State Athletic commission to all boxers participating in California bouts. Fighters must refrain from swearing in the ring, the commission explains, and any boxer who reacts a hard blow by calling his opponent a hard name may find himself "suspended for an indefinite period and fined as well."

Island farm center, Kings county, was given the trophy gavel, won for highest percentage gain in membership in 1926 over 1925, State Director Dallas Gray of Armona making the presentation at a recent meeting of the center.

Heralding one of the most gigantic leasing projects ever launched in Kern county, the Shell Oil company, is at the present time testing 90,000 acres of Miller and Lux lands in this county with the Torsion balancer to determine whether or not they are oil bearing, according to official statements received here.

N. W. Stice has been appointed seed inspector for the state department of agriculture and is now at work in southern California, inspecting stocks of seed displayed for sale to insure compliance with the regulations of the California Pure Seed Act.

Bees, who took refuge in a ventilator opening in the school walls, in Alturas, early this summer, were found to have stored up 500 pounds of honey when dislodged with the opening of school by L. M. Jones, the janitor.

A group of Porterville orange growers, attended a conference of citrus growers at the experiment station in Riverside. The conference was held to outline a series of fertilizer experiments on an elaborate scale, to run for a period of twenty-five years.

The largest timber cut made in any single month since the inception of operations was made in August by the Hutchinson Lumber company of Oroville. Working two shifts, a total of 13,978,000 feet of lumber was cut at the mill, establishing a new record.

The trustees of Lemoore, Kings county, have set the tax rate in the city for next year at \$1.72 and in the Decker and Dingley Additions at \$1.44. A decrease in the annual interest payment this year is offset by decreased valuation of unsecured personal property so that the trustees state the tax rate could not be lowered.

The Winters tax rate which last year was \$1.90 on the \$100 assessed valuation, has been reduced to \$1.75, a drop of 15 cents. The drop, according to the Winters city trustees, is due to the fact that the city hall has been completely paid for and that the bonds which have been running since 1915 are now concluded. The city hall cost \$12,000.

Owing to the warm weather in the San Fernando section of the San Fernando valley this summer, the Lima bean crop is maturing about twenty days earlier than usual. Ordinarily it requires about 110 days to grow a crop but this season the harvesting is taking place within ninety days. Lima bean gathering is now under way throughout the valley.

Price of August eggs, in Tulare, has been set at 34, 26 and 20 cents, or 4 and 5 cents lower than a year ago, the Tulare association announces. Owing to the lower prices on feed this year the poultryman's profit is considerably more despite the lower prices. Total volume of business done during the past month by the association was \$23,000.

The seventy-second annual state fair, a record-breaking exposition both from the standpoint of attendance and colorful display of California resources, passed into history with a final program featured by a joint meeting of California farmers and bankers. Directors estimated that the number of visitors during the week totaled well over 200,000.

Building permits in Redlands have reached the \$750,000 mark for the present year. Two permits to be issued soon will bring the total in excess of \$1,000,000, even with last year at this time. One permit will be for Chapel Hall, at the University of Redlands. It will involve \$200,000. The new Young Men's Christian Association building will cost \$150,000.

The state highway commission announced road improvement projects in San Mateo, San Francisco and Marin counties. An authorization of \$2,900 has been made for improving a stretch of streets in Sausalito, Marin county, between the ferry and the Redwood highway and \$4,995 has been voted for oiling 5.5 miles of the Skyline boulevard in San Francisco and San Mateo counties.

Final attendance figures for the summer encampments of the California national guard, compiled by Adjutant General R. E. Mittelsteadt, show that a new record was established. Eighty-three per cent of the total strength of the national guard attended the camps and seventeen units were there in full strength. The attendance was 4,400 out of a total enlisted strength of 5,300.

Harold Palmer, Exeter, has erected a plant for soda dipping and treatment of raisins on the Ernest Detner ranch, two miles north of Exeter. In addition to caring for his own crop, Mr. Palmer will do commercial work in processing of raisins, he said. Drying fields have been prepared adjacent to the plant. Mr. Palmer expects to handle a large quantity of raisins during the season which is now just starting.

Frank McArthur of Likely, Modoc county, applied to the state division of water rights for a permit to divert four second feet of water from Crooks Canyon Drainage area, a tributary to the South Fork of the Pit River, for irrigation and domestic purposes. The project, the cost of which is estimated at \$775,000, also includes the construction of a dam and the storage of 9,000 acre feet. The land to be irrigated from this source totals 4,630 acres.

Public utilities companies of California spent \$95,230,078.80 in operating expenses last year, it was announced by the finance and accounts committee of the state railroad commission. The commission has just completed its survey of the gross operating revenue and expenses filed by the 1,791 public utilities which operate in this state. The utilities showed an increase over \$63,000,000 in expenses over their accounts for 1924.

Vouchsafing to Sacramento's further claims to the title "California's convention city," word was received by civic leaders that four state organizations have joined the number selecting Sacramento as a 1927 meeting place. The California Department of the Reserve Officers' association, the California Federation of Post Office Clerks, the California State Builders' Exchange and the State Letter Carriers' Association are the latest to signify an intention of holding conventions in Sacramento next year.

THE WORLD'S GREAT EVENTS

ALBERT PAYSON TERHUNE

(© by Dodd, Mead & Company.)

The Conquest of England

LITTLE has been said of England in this series. Not that its history up to this point had not been of great interest, but it had had until the Eleventh century comparatively little influence on the general history of the world.

In the early days the country had been populated by heathen, savage tribes forever at war with each other. They had combined against the Romans who invaded the country under Julius Caesar, and for a time were successful in repelling the better-disciplined foe. The Romans won difficult foothold in Great Britain, but the natives at last drove them out and won independence. Then Teuton warriors from the borders of Germany and Scandinavia overran England. These new invaders were known as "Saxons," though in time they called themselves "English." They completely won the country, which they proceeded to apportion and then to fight over among themselves. Down came the Danes, or Northmen, conquered the Saxons and gained control of England. But the Saxons within a quarter century put down the Danes, and made themselves once more masters of the sorely distraught island. After which, in spite of internal strifes and petty wars, they remained in control until the middle of the Eleventh century.

Then came a political snarl whose rights and wrongs have never been clearly settled. The muddle, briefly, was as follows:

Edward, king of England, had no sons. He was related to the dukes of Normandy (descendants of the Norse pirate, Rollo), and promised to make Duke William of Normandy his heir. As the English throne was not a private possession to be bestowed at will, Edward had not the slightest right to make this promise. He was a man whose alleged piety served as a cloak for political intrigues and won for him the nickname of Edward the Confessor. He was Norman in sympathies, and though he knew his Saxon subjects hated the Normans, he still planned to overthrow the brave Saxon dynasty in the latter's favor.

The "political boss" of England at the time was one Earl Godwin. He was the people's idol, represented the pro-Saxon, anti-Norman element and was strong enough to defy even the king. Godwin's son, Harold the Fair-Haired, was exiled from England and fled to Normandy, where Duke William, for reasons of his own, received him cordially. In return for this kindness (the Norman duke later declared) Harold promised to support William's claims as Edward's successor and did him homage as his rightful master. Harold returned from exile, and on Godwin's death inherited the old earl's popularity and political power.

So when, in 1066, King Edward died without an heir, the people unanimously chose Harold as king of England. William at the same time sent envoys to remind him of his promise. Harold packed the envoys off again with no satisfactory reply and assumed the sovereignty of the country.

But the strain of Scandinavian pirate blood would not allow William to submit tamely to this downfall of his hopes. He stirred up Hadrada, king of Norway, against Harold, and himself fitted out an expedition against England. The Norsemen under Hadrada swept down upon the British coast (the last of their many invasions) and William raised an army to follow their example.

On September 24, 1066, Harold met the Norwegian army and utterly routed it, driving the Scandinavians forever from British soil. Then he turned to meet William, who, with a mighty Norman host, had crossed the channel. The two armies—Saxon and Norman—met at Hastings, October 14, 1066. Harold's army, already weakened by their battle with the Norsemen, fought heroically, and even in the van was their gigantic, yellow-haired king. A Norman arrow wounded Harold. Before he could recover himself four Norman knights hurled themselves upon him and killed him. Seeing their leader fall, the Saxons fled. Though for five years longer they fought valiantly to repel the Normans, they were little by little subdued, until by 1071 England was a mere Norman possession.

Much pathetic nonsense has been written of the brutal conquest of England by Norman robbers. As a matter of fact, it was the best possible thing for the country. The Saxons had been a heavy, boorish, stupid, nonprogressive race. The Normans were up to date, alert, eager for improvement and advancement of all sorts. The rough strength and ruder virtues of the Saxons blended at length with the skill, culture and chivalry of the Normans; the combination forming one of the greatest, most powerful nations the world has ever known. Within a few generations Saxon and Norman were merged. To the result of this "merger" England owes her later prowess. But the conquest's chief result was the wedding of the Saxon and ancient French dialects into the English language.

While the conquest itself was without legal or moral justification, yet its prime mover's genius made it the ultimate benefit to humanity at large that it proved to be.

Says Tanlac Spells Health

Mother of 4 Children Escapes Serious Condition Caused by Nervousness, Gastritis, Dizzy Spells. Strength Restored. Gains 12 Pounds

Many women endure pain and suffering needlessly. As Mrs. Hattie Franklin, 1054 Georgia Street, Los Angeles, California, recently said: "A mother must have good health. For years I suffered from nervous run-down condition. My appetite was never good. Stomach pains and nervous spells followed every meal. And I was quite unfit to do my housework."

"All the remedies I tried failed to help me. I wasted away until I was down to 95 pounds. Then Tanlac came to the rescue. I found myself feeling like a new woman. I gained 12 pounds and felt stronger. And now when I feel less energetic I take Tanlac. To me this wonderful tonic spells h-e-a-l-t-h."

Tanlac, nature's remedy made from roots, barks and herbs according to the famous Tanlac formula, usually builds strength and good health. First bottle gives amazing results. At druggists. Over 40 million bottles sold.

First Thing He Knew

About the Accident

There had been a minor accident and a slight interruption in the flow of traffic. Complaint came in a stream from the mouth of the driver of a small car. The patrolman lent an ear. The young man, the victim, stood still, looking faintly amused.

When the driver had worn himself out, the patrolman turned to the young man.

"Well," he said, "you tell your side of the story."

The youth regarded him, took a cigarette from his lips, and cast it carefully into the gutter. The gesture was one of easy arrogance.

"Why," he explained, "I was crossing the street, I felt something brush me, and when I looked up I found this fellow's ear—on my foot."

Watch Cuticura Improve Your Skin.
On rising and retiring gently smear the face with Cuticura Ointment. Wash off Ointment in five minutes with Cuticura Soap and hot water. It is wonderful what Cuticura will do for poor complexions, dandruff, itching and red, rough hands.—Advertisement.

Laboratory on Wheels

John Graham, the premier pathfinder of the United States, has been traveling between 40,000 and 50,000 miles a year for the past 14 years. He now has a nation-wide job of checking road maps for one of the largest map firms in the world. His scout car looks like a laboratory or a power house, and on the instrument board are found a tachometer, aneroid barometer, ammeter, oil gauge, gasoline gauge, ignition and light switches, speedometer, odometer and clock. Among the equipment are shovels and tow chains, ax, portable typewriter, compass, sleeping outfit, a gallon of gas, a gallon of oil and clothes for eight or ten weeks.

S. O. S.

Twenty-five thousand people have been rendered homeless as the result of a tropical hurricane that swept Florida, carrying destruction in its path and taking a great toll of life. The damage that has been caused will never be exactly known. You have all read and seen the pictures of the terrible disaster and the havoc that it has caused, not only to property, but also in lives—added to this the report has gone out that there is great danger of an epidemic of disease.

Now the distress signal comes for help, and our minds immediately go back to 1906 when San Francisco was swept by fire and left thousands homeless. We sent out the S. O. S. for help and from all over the world contributions poured in.

Once again the S. O. S. has been sent out—ringing in the air from a stricken and homeless people in Florida, who need food and clothing and other necessary supplies to carry on the wonderful work of the American Red Cross. So let's all get together and do our part, even though it be small, to help the unfortunate people of the hurricane devastated part of Florida.

All contributions, no matter how small, will be received at the Liberty Bank, Daly City, and turned over to the Red Cross to carry on the good work.

S. O. S.! Save, Oh Save! is what it means.

SO YOU MAY KNOW

There are no towns in this section of the state, and, in fact anywhere else in the country that have the boosting spirit of Daly City and Colma. They are just little mites, but what big mites these little mites are. You outsiders looking in—come on in, the water's fine—we have the city and the people who are not afraid to do things for the city and back those things up, and these cities are spots that are worth while living in. To prove what we have just said in the above statement (see illustration of 20 years ago, elsewhere in this issue.) compare the difference between then and now—Nuf sed.

CORRECTION

In the account of the activities of the drill team of El Carmelo Parlor in last week's issue of The Record, the name of Fred Collins was unintentionally omitted. Mr. Collins, assisted by Francis Bracken has been the official drill master of the team. The following girls' names were also accidentally left out, discovered to be due to the fact

STOCK HOLDERS

Stockholders—people of California—provide the money that builds the dams, power houses and transmission lines that bring light and power to your door.

Their money is invested in these service giving facilities.

This is people's ownership.

There are 175,986 of them on the lists of California Power Companies, and their homes are to be found in almost every city and town.

There's a power company security (Stock and/or Bond) holder for every three homes.

PACIFIC GAS AND ELECTRIC COMPANY

Owned · Operated · Managed
by Californians

that the line was not spaced out sufficiently to cast in the mould, and the proof not having been read according to copy. We are sorry this happened, and here are the names of the girls left out: Misses Sarah Battini, Margie O'Connor, Thelma Selmi and Louise Segale, all having taken an active part in the Admission day parade and competitive drill.

WHY?

We have nothing to say, no comment to make in this article as to whether there is innocence or guilt on the part of the person or persons whom we have in mind. But the thing that strikes us as being very peculiar is the fact that some people will run along—supposedly knowing all about it, supposedly having evidence that is convincing—for months, saying nothing, then all of a sudden come to the front with damning statements, that set the public to guessing (the public not doing enough guessing as it is.)

California has a case of much magnitude that is occupying its attention at the present time. One minute the daily papers will come out with statements to which they will come out again in the next moment giving these same statements the lie.

Our conception of justice is to get your evidence, present it to the grand jury, issue a warrant for an arrest, or forget about the case, if it has no merits, until such time as new evidence comes to the front, and then repeat the same process. The idea of keeping the pot boiling in the yellow journals is all "bushwa."

One would think that the big sheets were hard up for news, and would expect one of the reporters to say—like the old-fashioned country correspondent for the home weekly paper: "News ARE scarce."

MEMORIAL TO LABOR

One of the first churches ever erected by a labor organization in the world and the first memorial to be built by a labor union in America is announced in the memorial chapel of the International Printing Pressmen and Assistants' Union of North America. It is being built at Pressmen's Home, Tennessee, near Knoxville, in honor of members of the organization who served in the World War.

The case of Aimee Semple McPherson in Los Angeles puts in mind of "Off again, on again, gone again, Finnegan."

GRANDMA? WHO?

We have often wondred, too; but we didn't have nerve enough to say so; and because we have a dear old grandma, who we know is still the old-fashioned kind; at least the last time we saw her—back in the sticks of Iowa—that's the kind she was—but Joie writes and tells us that Mamie takes after Grandma. Aunt Jane was over to see the folks some time ago and she writes and also tells us that Grandma (when she's all dolled up) is a "dead ringer" for Margaret. Now there you are! Mamie is older than Margaret.

Now we're afraid to go back for fear that we ain't got no Grandma at all. Y'see we're gettin' the hunch more and more, "day by day," that our grandmas are passing away; 'cause, when we were walkin' down the street a little lady we chanced to pass, and just slightly above her feet, her ankle looked mighty neat. Her skirts were high, and, oh, my, she had a wonderful form and her waist was neat and she stepped along with a lively gait as we passed her going down the street.

And we turned to look—Somebody's Grandma! All of which leads us to reproduce the story by someone who had nerve enough to write it, in the S. F. Examiner:

WHY, GRANDMA!

A lady used to be called old at 50. Then she retired into an ingenioso, wore a white cap, and darned stockings.

A London newspaper asks where is the grandma of yesterday, and fails to find her by the fireside.

A reporter made out a list of seven grandmas he knew and went out to find them.

One was in Paris buying frocks. Another was in the country trying out a new sports roadster on a visit to her grandchildren.

Another was making a political speech for her son. Another had gone to a matinee, while another was buying new valves for her radio set.

And the last two were having hair cuts, preparatory to the dancin' in a big hotel.

There has been a good deal of talk about young ladies of today. But what about Grandma?—S. F. Examiner.

AGED JANITOR WHO LOST ALL

P. M. Jost of the Sun Life reports a rather unusual if not pathetic incident that occurred in his office last week.

A rather elderly man answered one of its annuity advertisements and inquired the cost for a small annuity. He was at present employed as a janitor in a down town office building.

During the course of conversation the elderly applicant remarked that if he had known several years ago that it was possible to purchase an annuity he would have saved himself just \$10,000. It appears that he had been a victim of a smooth-tongued stock salesman and lost his entire life savings and now in his declining years is compelled to earn his living, is all alone, nobody to care for him. The purchase of an annuity at that time for \$10,000 would have amply provided for this particular man's present requirements, but now it is too late.

A man in Portland, Me., who never has had any money and who plans to contest the will of his father, expecting thereby to obtain at least \$1,000,000, says there's only one thing that thae he wants to buy with the money "and that's a horse." It takes all kinds of people to make a world, even when it has become motorized.

S. S. F. TO HAVE NEW PUMP FOR ITS FIRE DEPARTMENT

South San Francisco will purchase a new \$12,500 pumper for its fire department if unofficial action taken at a meeting of city trustees and fire workers held in the city hall Monday is ratified.

The pumper will be of the 750-gallon capacity type with an 80-gallon auxiliary and will include latest features of modern fire fighting equipment.

"We will make every effort to provide the people of the community with the very best in fire protection," declared Mayor Fred Cunningham. "At the same time we realize that the utmost in economy must be enforced to save the taxpayers from an excessive burden. We feel however, that it will be possible to purchase this truck out of the \$1.00 per \$100 provided in the assessment for the general fund."

A thorough system of training for the fire department was urged at the meeting and the fire commissioners will meet soon to map out a program for this training.

Africa has doubled its use of motor vehicles in the past four years. The registration was 65,689 by the end of 1925.

Colma News Notes

By SYLVIA FISCHER

ank Sprecher and Roy D'Arcy of Cruz visited friends in Colma.

hard fought baseball game between the team of the Colma Athletic and the San Bruno team at San last Sunday ended in the score to 1 in favor of San Bruno.

ss Elsie Forsell of Los Olivos who underwent an operation appendicitis at the Franklin hospital in San Francisco last week is feeling nicely.

ny local people attended the big given at Tanforan race track Sunday, to raise funds for a new in Golden Gate Park as a memorial to Mr. McLaren.

William Sweeney, son of Mr. and William Sweeney, of Mission St., need his ankle during the football game at Jefferson Union High school Sunday.

and Mrs. E. Bergmann, Mrs. ge Martinelli and baby son, of Francisco, spent one day of last at the Haubrich home on Mission street.

rs. Ramirez and Miss Alma Ramirez of San Francisco visited Mrs. B. Haubrich of Mission street last ay.

Mrs. Al Zanetti, of Vale street at last Tuesday in San Francisco.

rs. Earle Jones of First avenue at Thursday of this week in San Francisco.

rs. Lorraine Wall will entertain members of the Drill Team of El melo Parlor No. 181, N. D. G. W., her home in Crocker tract on Friday evening.

eddy Fischer of South San Francisco was a dinner guest of Mr. and Stephen Fischer last Thursday night.

Mrs. B. W. Haubrich and Mrs. phen Fischer left for Capitola where they will spend several days.

Mr. Gene Grey has purchased a handsome Willys Knight Coupe.

The building of the Colma Motor company has been remodeled and presents a handsome appearance.

Don't forget that the Colma Community Center will sponsor a cabaret party dance in the Colombo auditorium on Saturday evening, October 2. Dell's Jazzy orchestra will provide dance music on this occasion.

Mrs. Johnston and Miss Grace Johnston of Mission street spent one y of this week in San Francisco. Mickey Millerick of Los Angeles, is a Colma visitor on Wednesday of this week.

Sylvia Fischer took part in the parade and rodeo held at Tanforan race track last Sunday.

El Carmelo Parlor No. 181, N. D. G. W., will give a monster whist party on October for the benefit of the homeless children taken care of by the order.

Mrs. Annie Biggio of San Pedro avenue spent Friday of this week in San Francisco.

Victor Rossi participated in the parade and rodeo held at Tanforan last Sunday, the affair being held to raise money for a McLaren memorial lake in Golden Gate Park.

A meeting of the Drill Team of El Carmelo Parlor was held in the Daly City auditorium last Friday evening, under the direction of Drill Master Fred Collins.

NEW AUTO PARK

California will have a new tourist attraction for the next motoring Automobile Club. East of the Yosemite, according to the national mite National Park, surrounded by the snow capped barrier of the high Sierras is a region of crystalline lakes and weird mountain ranges which has been recommended for inclusion into the area of Yosemite Park.

The commission which inspected the proposed addition was headed by Stephen D. Mather, director of the National Reservation, but owing to mining claims established in 1906 this section was taken out of the park area. Mining claims have been abandoned and for this reason the way is left open for the government.

Chief in importance of the attractions of this region is the Devil's Post Pile, a basaltic formation of freak columns closely packed together. It is similar in appearance to the giant causeway of Ireland and is now a national monument under the administration of the National Forest Service.

Other attractions in this region include the Thousand Island Lakes, Mt. Ritter, at the foot of which rises the middle fork of the San Joaquin River. Here, too are to be found the Minarets black needle pointed shafts reaching their black peaks into the blue sky.

One of the entrances to this region of scenic grandeur is by way of Tuolumne Meadows.

DEAR DEERS!

Admission that he had killed two deer on property of the Spring Valley Water Company near San Andreas lake was made by Edward Beach of San Bruno when brought into court of Judge Walter M. Bird at Burlingame today.

The San Bruno man told the court he had killed two of the animals with a single shot, but later changed his story, saying that he had been "confused" when he made the former statement. He pleaded guilty—following questioning by the judge, and will be sentenced on Monday.

Beach was arrested by guards of the company who found the bodies of the slain animals nearby, they testified.

ROY SCOUTS

The annual Boy Scout Training Camp Rally and Reunion is to be held on Friday, October 1, 1926 at the Burlingame High School Auditorium. The program which is being arranged by Emmitt Hays and John Linden will commence at eight o'clock sharp.

The above conclusion was reached a few days ago at a meeting of Camp Officers in Burlingame.

Among the interesting features on the program are the showing of the Camp Movies for the first time, first aid and signaling stunts, Camp yells and songs, a model campfire program a reception of the Final Evening Parade, and a daily Camp program.

In addition to the program there will be the awarding of 163 merit

badges earned at camp and the awarding of the Eagle Scout Badge to Scout Roy Duntun of Troop 98 of San Mateo. With the awards will be short remarks by President Charles J. Eldridge, and District Commissioner, Frank H. Thrall. President Charles C. Moore of the San Francisco Council will be among the honored guests from our neighboring council. It will be impossible for Scout Executive Raymond O. Hansen of San Francisco to be present as he is attending the Scout Leaders Convention that is being held in Little Rock, Arkansas.

To remind the scouts of old times and the good times we had at camp the writer who is Editor of the San Mateo Scout which was published daily at the camp is going to reprint a thousand copies of one of the issues that will be distributed at the rally.

In all it looks as though this rally will eclipse any previous rally held in San Mateo County and those who saw the rally last year know what this rally will have to be to be better than last year's rally.

During the moving pictures Field Executive, Edward A. Barrer will tell the parents about the camp. This rally is being conducted entirely by the Camp Junior Officers.

GRACE PRESBYTERIAN CHURCH

Remember that next Sabbath will complete the month's record and some will be amazed and some ashamed to know that they have been so few times in the service during the month.

A climax Rally Day Service will be held Oct. 3rd, at which time there will be a special program of music and good things. Special music is being prepared by the orchestra and extra songs, and a Radio will be installed and there will be Vocal Solos and a splendid good time for all, DONT MISS IT.

The special buttons were a drawing card for the Sabbath school last week, and several were proud to wear home the badge showing that they had brought a new scholar. The Subject for Next Sabbath evening will be "Let Us Alone, or the selfishness of every vocation." The C. E. was well attended last Sabbath evening and Miss Blacklock led a very interesting and helpful program. The following officers were elected for the next three Months. Pres. Miss Katherine McKeown. Vice. Pres. Mr. John Carnegie. Sec. Miss Kathleen Welsh. Treasurer, Mr. Gifford Teel.

You are invited to come and help with the program for next Sunday evening at 7 p. m. Neutrality in Religion means surrender to the devil. It is a man's inalienable right to make a fool of himself, but he should not use up all his privileges. Ask the first ten mothers you meet if they would vote for the open saloon next door. You will find a welcome here. Chas. H. Gatchell, minister. Phone Delaware 1544.

U. S. MAY ARREST ALL SLOW AUTO DRIVERS

Official suggestion has been made in Washington, D. C. that the police begin arresting motorists who drive slowly in the middle of the street instead of those who, in overtaking, pass them on the right. Both are violations of traffic rules, it is recognized, but of the two evils, the former is adjudged a freater hindrance to traffic.

NOTICE OF TRUSTEES' SALE OF REAL PROPERTY

WHEREAS, B. H. STEVENS, and DORIS J. STEVENS, his wife, as grantors, did execute their deed of trust dated the 24th day of March, 1923, to HERMANN DIECKMANN and D. A. STEINBAUGH, as trustees, for the benefit of the BAY VIEW BUILDING & LOAN ASSOCIATION, a corporation, and the holder of the promissory note by said grantors of even date with said deed of trust, the sum of three thousand (\$3000) dollars, said deed of trust conveyed to said trustees the real property hereinafter described and interest thereon, and the said HERMANN DIECKMANN and D. A. STEINBAUGH, as such trustees, have duly executed and delivered to the said BAY VIEW BUILDING & LOAN ASSOCIATION, a corporation, and the holder of the promissory note, a copy of said deed of trust, and a copy of said resolution of said corporation, certified by the secretary of said corporation, under its corporate seal, and attached to said instrument of assignment, conveyance and transfer was heretofore on the 21st day of December, 1923, duly recorded in the office of the County Recorder of San Mateo County in Volume 56 of Official Records at page 378, reference to which is hereby made, and whereas, the said HERMANN DIECKMANN and D. A. STEINBAUGH, as such trustees, have duly executed and delivered to the said BAY VIEW BUILDING & LOAN ASSOCIATION, a corporation, and the holder of the promissory note, a copy of said deed of trust, and a copy of said resolution of said corporation, certified by the secretary of said corporation, under its corporate seal, and attached to said instrument of assignment, conveyance and transfer was heretofore on the 21st day of December, 1923, duly recorded in the office of the County Recorder of San Mateo County in Volume 56 of Official Records at page 378, reference to which is hereby made, and whereas, the said HERMANN DIECKMANN and D. A. STEINBAUGH, as such trustees, have duly executed and delivered to the said BAY VIEW BUILDING & LOAN ASSOCIATION, a corporation, and the holder of the promissory note, a copy of said deed of trust, and a copy of said resolution of said corporation, certified by the secretary of said corporation, under its corporate seal, and attached to said instrument of assignment, conveyance and transfer was heretofore on the 21st day of December, 1923, duly recorded in the office of the County Recorder of San Mateo County in Volume 56 of Official Records at page 378, reference to which is hereby made, and whereas, the said HERMANN DIECKMANN and D. A. STEINBAUGH, as such trustees, have duly executed and delivered to the said BAY VIEW BUILDING & LOAN ASSOCIATION, a corporation, and the holder of the promissory note, a copy of said deed of trust, and a copy of said resolution of said corporation, certified by the secretary of said corporation, under its corporate seal, and attached to said instrument of assignment, conveyance and transfer was heretofore on the 21st day of December, 1923, duly recorded in the office of the County Recorder of San Mateo County in Volume 56 of Official Records at page 378, reference to which is hereby made, and whereas, the said HERMANN DIECKMANN and D. A. STEINBAUGH, as such trustees, have duly executed and delivered to the said BAY VIEW BUILDING & LOAN ASSOCIATION, a corporation, and the holder of the promissory note, a copy of said deed of trust, and a copy of said resolution of said corporation, certified by the secretary of said corporation, under its corporate seal, and attached to said instrument of assignment, conveyance and transfer was heretofore on the 21st day of December, 1923, duly recorded in the office of the County Recorder of San Mateo County in Volume 56 of Official Records at page 378, reference to which is hereby made, and whereas, the said HERMANN DIECKMANN and D. A. STEINBAUGH, as such trustees, have duly executed and delivered to the said BAY VIEW BUILDING & LOAN ASSOCIATION, a corporation, and the holder of the promissory note, a copy of said deed of trust, and a copy of said resolution of said corporation, certified by the secretary of said corporation, under its corporate seal, and attached to said instrument of assignment, conveyance and transfer was heretofore on the 21st day of December, 1923, duly recorded in the office of the County Recorder of San Mateo County in Volume 56 of Official Records at page 378, reference to which is hereby made, and whereas, the said HERMANN DIECKMANN and D. A. STEINBAUGH, as such trustees, have duly executed and delivered to the said BAY VIEW BUILDING & LOAN ASSOCIATION, a corporation, and the holder of the promissory note, a copy of said deed of trust, and a copy of said resolution of said corporation, certified by the secretary of said corporation, under its corporate seal, and attached to said instrument of assignment, conveyance and transfer was heretofore on the 21st day of December, 1923, duly recorded in the office of the County Recorder of San Mateo County in Volume 56 of Official Records at page 378, reference to which is hereby made, and whereas, the said HERMANN DIECKMANN and D. MACHINE MARKS BUMPS IN ROAD

**Confirms Belief Gravel Can
Be Smooth as Pavement
in Fair Weather.**

Records of the number of bumps in a mile of road are now being kept by the Minnesota highway department, according to a recent bulletin. The record is made with a "roughmeter," a device attached to an automobile in such a manner that when the car strikes a bump which depresses the front springs one inch, one "point" is recorded on the dial on the instrument panel. Bumps may record from one-thirty-second of a point to two or three points.

Many Bumps Recorded.

On a recent test run made by O. L. Kipp, construction engineer of the department, and F. C. Lang, engineer of tests, one piece of pavement was found on which 528 points were recorded. This, however, had been built before the state trunk highway system was established and has carried several thousand vehicles per day for several years. The minimum on pavement was 56 points in a mile, and most of the pavements built by the state showed from 80 to 150 points per mile. Some of this was on new construction, where the expansion joints had not yet been smoothed down.

The minimum on gravel was 106 points and the maximum recorded was 445, but the latter was on a road so rough that it was necessary to slow down and dodge around holes. A much higher record would have been made if the average speed of 35 miles per hour had been maintained as was done on the pavement and the better gravel roads. On well-maintained and recently leveled gravel road, the "points per mile" usually ran from 150 to 200.

Smooth Gravel Roads.

"The record confirms the popular impression that some of our gravel roads are 'smooth as pavement,'" Commissioner C. M. Babcock said. "The only trouble is that it is impossible to maintain that surface in all kinds of weather or under heavy traffic. We have some gravel roads that cost us more than \$2,000 per mile per year for maintenance, and still their condition is far from good."

"The abundance of gravel in Minnesota, however, has made it possible to get the state out of the mud years ahead of some of our neighbor states. There are some states which have much more pavement than we have, but their secondary roads are still mud roads. In Minnesota these secondary roads, and the trunk highways with lighter traffic, which we cannot afford to pave for many years, if ever, can nevertheless be kept in good condition in any ordinary weather, and passable in almost any weather."

Good Ideas Sometimes

May Become Quite Silly

Frequently it is necessary to put an end to good ideas that gain so much headway they become foolish. Generous tappet clearance is an advantage in hill climbing and does give a snappy motor, but there is great danger in carrying the idea too far. If there is too much noise, it may mean there is a great sacrifice in power.

Also much depends upon the make or type of engine. Where valves are of cheap metals with a tendency to excessive expansion, loose tappets will make for power, but only when the engine is warmed up. Since most engines are hot when they reach the real struggle on hills, excess tappet clearance is proper for engines of such construction. Where valves are designed to compensate for their own expansion, however, noise may be a real loss of power.

The danger lies in applying the noise-power theory to the wrong engine, to the wrong conditions or by overdoing the idea. If valves do not lift fully, they will not let in enough gas nor exhaust burned gases quickly enough. This means power loss. Some drivers do most of their hill climbing when their engines are cold. The less tappet clearance the better under such circumstances.

NEW YORK'S ONLY AUTO TOURIST CAMP

Where hundreds of auto tourists rest overnight in New York city. Camp New York, New York city's only tourist camp for automobilists, is situated at Baychester avenue and the Boston Post road, Bronx, New York city. The photograph, made in one of the sylvan groves, shows several parties of tourists, among the few of the hundreds there, making camp for the night.

Which Wheel Shall Have New Tire Is Question

A question often asked by motorists has to do with the placing of tires to receive the greatest mileage and service from them. There is some little difference of opinion among tire users as to whether the two best tires should be placed on the front wheels or on the rear. One group claims that the best tires should be on the front, to eliminate or minimize the danger of losing control of the car in case of a blowout while traveling at a high rate of speed.

Experience proves that the danger from this source is negligible and is in every case the fault of the driver in losing his head. Efficient operation of a car requires good traction and for this reason the best tires should be on the rear wheels. The tires that are more worn should be on the front wheels.

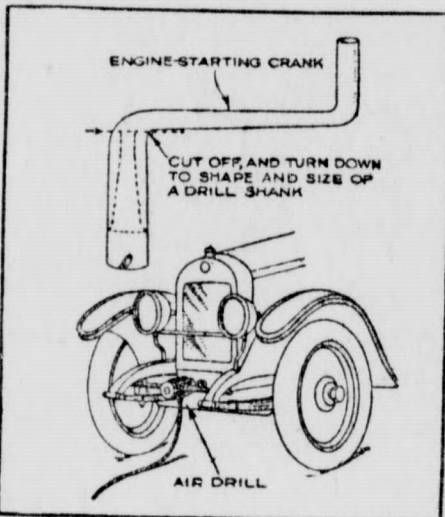

In the case of a new or practically new spare tire this should be used in the following manner: At the end of several thousand miles of driving examine the rear tires and select the one that shows the most wear and remove it, replacing it with the spare. Repeat this operation.

On new cars where usually there are five new tires they may remain in their original positions until several thousand miles have elapsed, then the front tires should be put on the rear wheels and vice versa. The fifth new tire should have its regular turn on the car.

In changing tires around on the car, the motorist should be certain that the air pressure in one tire corresponds with that in the same tire on the other wheel.

Air Drill Very Useful to Start Auto Engine

In the motor-repair shop, where an air drill or motor is used, it can be applied to starting motors that have had their bearings readjusted, and are consequently stiff and hard to start by ordinary methods. For this purpose, the ratchet end of a starting crank is cut off, as shown, and

How Air Drill Is Applied.

the shank tapered to fit the drill collet used with the motor. With this arrangement in place on the crank-shaft of the motor, the air is turned on. If the engine refuses to turn over, leave the air turned on and push down on the electric starter button. The combined efforts of the two will usually start the engine, and the air motor alone will be able to keep the engine turning until the ignition is switched on.—Popular Mechanics Magazine.

War Is Being Waged on Many Kinds of Covers

There is a determined effort on the part of experienced mechanics to discourage the use of covers of all kinds. Most owners have come to appreciate that it is not good to cover a new tire unless such covering is taken off after rain storms to allow the rubber to dry thoroughly. Many others are discovering that while spring covers keep dirt out they also keep rust and dirt in, and are less than 25 per cent efficient as lubricators of spring leaves. Now the repairers are condemning the boots that are intended to protect otherwise exposed universal joints. The argument is that since universals must throw gases through centrifugal action such grease accumulates inside the cover and causes it to "belly." Soon the cover is a rotation weight that tends to unbalance the propeller shaft.

RADIO

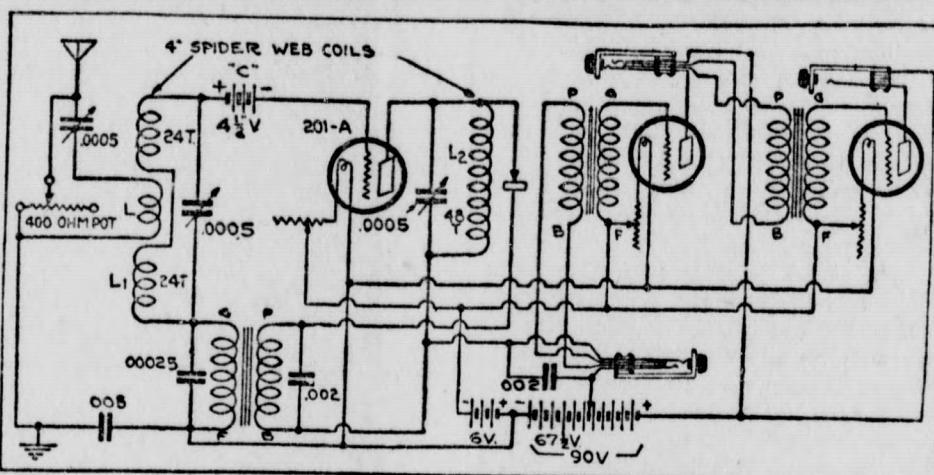

Diagram of a Three-Tube Reflex Hook-Up With Constants Being Shown. Summer Static Is Reduced to Practically Nothing.

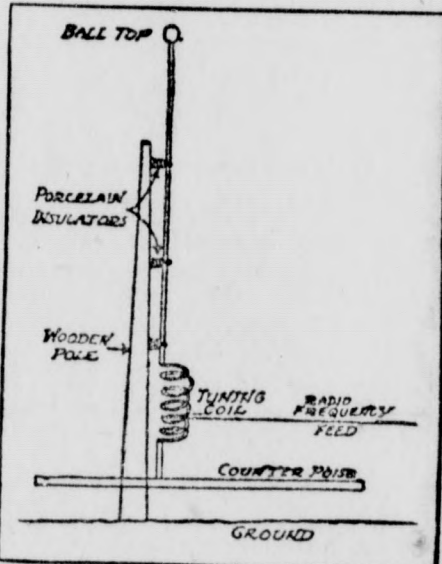

The principal feature of the circuit shown, which is of my own origin, writes William L. Travis in Radio Digest, is that summer static is reduced to practically nothing. Yet, the signal strength is greater than any of several regenerative sets that I have tried. This, I think, is due to the variable resistance in the aerial circuit. Its selectivity is as good as a well made, five-tube, tuned radio-frequency set, while its DX record is as good as my neodyne. When properly adjusted and tuned to any wave length, I have found its tone quality to be superior to any set I have heard.

The only time I am annoyed with other disturbances is when an electrical storm is within a radius of five miles. Ordinary static, while very annoying on radio-frequency or regenerative circuits, is not troublesome on this one.

New Upright Antenna Used by Station KDKA

At either side of station KDKA (Pittsburgh) stands an antenna system, one of the new upright structure, and the other of the conventional horizontal or flat top structure; one used for short-wave transmission, the other operated on an assigned broadcasting wave length; one, counting as its province only places on the North American continent, although it is heard regularly in parts of South America and Europe; the other reaching out with consistent day-after-day transmission to the furthestmost corners of the earth.

One of these antenna systems is for the station's 300-meter wave length, while the other radiates on the short wave lengths. The upright antenna, the one used with the short-wave transmitting set, is one of the most efficient antenna it is possible to build, of any type, considering the present knowledge of radio phenomena. KDKA engineers declare, as it has been practical to build this antenna so that its natural period of vibration or fundamental frequency is very close to that used in the short-wave transmissions to be radiated from it. That means that very little tuning of this antenna is required and the losses of power or energy through tuning are therefore very small. This antenna also permits the use of about the greatest effective height that can

Type of Antenna Used for Short Wave Transmission.

be obtained on the particular wave length in use.

A wooden pole supports a pipe cut near the center for the insertion of the tuning coil as shown. The pipe is supported on long porcelain insulators and is topped with a large ball. A counterpoise is used instead of a ground connection. The antenna is fed through a radio-frequency transmission line so that the antenna can be located at some distance from the transmitter itself.

The horizontal or assigned wave-length antenna also is very efficient. The fundamental frequency, however, is not quite so close to that of the wave length which is to be radiated. Also, the full possible advantage has not been taken of height. This is because of the type of support used for the antenna, a type which has many advantages over steel to compensate for the added height possible through the use of steel supports.

Several antennae are used in the short-wave transmitting system. These different antennae are located with the idea of getting directional effects on the long distance relaying. Each antenna consists of a copper tube supported vertically on a high wooden pole with a small horizontal counterpoise element at the lower end about four feet from the ground. Long porcelain insulators hold the tube rigid and further reduce electric losses.

The length of the short wave radiated by the station expressed in feet is approximately 200 feet. The an-

tenna is a few meters less than half the length of the wave which it radiates, but a short horizontal counterpoise element at the bottom end of the tube, and the lead-in wire connection with the set, help to compensate for the deficiency in length, and bring the natural period or fundamental frequency of the antenna near that which is being radiated by the transmitting apparatus.

When winding tuning coils it is necessary to use some kind of a binder. The radio laboratory of the bureau of standards would recommend collodion for that purpose. Comparative tests with varnish, shellac, and paraffin produced results indicating that collodion is best, with the additional advantage of drying rapidly. Different binding materials were applied to a single-layer coil, just enough to cover the entire surface. The coils were then dried thoroughly. Since measurements were difficult, unusual care was exercised in performing the task. The difficulty of this test is apparent when we are told that in some cases the resistance of a coil using a binder was less by a fraction of an ohm than a coil to which no binding material was applied. Generally, however, the absence of a binder contributed to the "low loss" characteristics of a tuning coil.

Collodion Is Found Best Binder for Radio Coil

Various binding materials showed varying resistance at different radio-frequencies. Examples are quoted: At 300 kilocycles, a coil with no binder offered a resistance of 3.9 ohms; collodion, 3.8 ohms; commercial insulating varnish B, 3.9 ohms; shellac, 3.7 ohms; paraffin, 3.9 ohms. At 1,100 kilocycles, no binder, 10.3 ohms; collodion, 10 ohms; commercial insulating varnish A, 10.1 ohms; shellac, 11.4 ohms; paraffin, 11.8 ohms. At 1,400 kilocycles, no binder, 13.2 ohms; collodion 13.2 ohms; commercial insulating varnish B, 14.6 ohms; commercial insulating varnish A, 14.7 ohms; shellac 15.7 ohms; paraffin, 16.7 ohms. At a radio-frequency of 1,500 kilocycles, no binder, 14.2 ohms; collodion, 14.4 ohms; commercial insulating varnish B, 15.9 ohms; commercial insulating varnish A, 16.4 ohms; shellac, 17.2 ohms; paraffin, 18.5 ohms.

These results, as well as additional evidence, are responsible for the radio laboratory of the bureau of standards, in drawing up the following conclusion: "All the insulating materials which were used as binders caused very slight increases in the resistance of the coils. Collodion seems best, and also has the inherent advantage of drying rapidly after application to the coil. This is of especial advantage in the construction of a bank-wound coil."

Test Tubes by Shifting to Different Sockets. Tubes are not uniform in their characteristics. After a tube or set of tubes has been used for several months, they will develop slight differences that will make some more suitable for radio-frequency, others for audio-frequency, and still others for detector service. In order to tell which tube works best in a particular condition, the operator need only shift it from one socket to another, and instantly the effect will be observed.

The Best "Ground"

High resistance is introduced into the circuit by the heating system if a ground wire is connected to the radiator. This will have considerable effect on the receiving set. The cold water pipe is best for ground connections.

HOW I IMPROVED MY HEALTH

Did It in Less Than One Month

As Mrs. Weaver herself says, "I was never very strong."

This is a mild statement describing her condition, for, according to her letters, she was subjected to no small amount of ill health. Fortunately, her sister was familiar with Lydia E. Pinkham's Vegetable Compound and begged Mrs. Weaver to try it. "After three or four weeks," writes Mrs. Weaver, "I felt a great difference in myself. I would go to bed and sleep sound, and although I could not do very much work, I seemed stronger. I kept on taking it and now I am well and strong, do my work and take care of three children. I sure do tell my friends about your wonderful medicine, and I will answer any letters from women asking about the Vegetable Compound."—Mrs. LAWRENCE WEAVER, East Smithfield St., Mt. Pleasant, Pa.

If you knew that thousands of women suffering from troubles similar to those you are enduring had improved their health by taking Lydia E. Pinkham's Vegetable Compound, wouldn't you think it was worth a trial? In some families, the fourth generation is learning the merit of Lydia E. Pinkham's Vegetable Compound.

Remarkable Engraving

The Lord's Prayer, 63 words, 397 letters, counting punctuation marks, was engraved in 12 lines on the head of an ordinary pin by Charles Howard Baker of Spokane, Wash. Baker is now an inmate of an institution for blind and insane. The engraving cannot be read without the aid of a powerful magnifying glass. Baker was at one time an employee of the United States government in the bureau of engraving and printing. He spent three years and eleven days completing this work.

Most Valuable Mineral

Coal is Canada's most valuable mineral, says Finance Times. The 1925 output was worth \$49,000,000. It reached 13,000,000 tons.

Set aside three minutes each day to worry. Let that suffice for the day.

When a woman is unhappily married she would gladly recall her mis-spent life.

FIRST to adopt DUCO

THE General Motors Research Laboratories cooperated with E. I. du Pont de Nemours & Company, Inc., in the development of Duco—an achievement ranking in importance with the invention of the self-starter.

DUCO is not only far more lasting than paint and varnish; it is finer, more beautiful and more economical to apply in factory production.

DUCO was first adopted by Oakland, and immediately thereafter by the rest of the General Motors cars.

BUYERS of General Motors cars have profited by the development of this finer, more enduring finish. Their cars wear well longer.

ARCAL MOUNTAIN SHEEP

"It is quite sad," said Mrs. Arcal Mountain Sheep, "to see a creature all the time who is so much more handsome than one's self."

"One looks at the creature and says:

"Oh, how lovely!"

"Then one looks at one's self in a pool of water and says:

"Ah, how different! Not lovely at all!"

"Why are you talking in this way?" asked Mr. Arcal Mountain Sheep.

"I suppose," he added, "you are saying that because you think I am more beautiful than you are."

"Well," said Mrs. Arcal Mountain Sheep, "you are. You are so small and dainty. You have such beautiful big, curved horns, and your hair hangs so lengthily and gorgeously and magnificently."

"Gracious," said Mr. Arcal Mountain Sheep, "you pay my hair a great compliment when you say so much about it and use such long and mighty words."

"Your hair deserves long and mighty words," said Mrs. Arcal Mountain Sheep.

"But please do not feel discouraged about your own looks," said Mr. Arcal Mountain Sheep.

"You know, I thought you were a lovely creature when I saw you back in India, and I haven't changed my mind about you here in the zoo."

"Oh, is that so?" asked Mrs. Arcal Mountain Sheep. "Well, I won't feel discouraged or sad any more, but I will be glad and proud that you think so well of me, and I will simply enjoy your particularly good looks, for, after all, it is a great pleasure to be the mate of a beautiful creature."

But Mr. Arcal Mountain Sheep was making a low bow and saying:

"Just what I think, my dear."

Nearby Mother Aoudad was talk- ing to her children.

"The Aoudad children always come in the spring," she whispered.

"You always come late in February or early in March. Now the Zebu children, who belong to the wild cat-

The Aoudads Are Wild Mountain Sheep.

tle family of India, come any old time at all. One may arrive late in the spring or even in the fall.

"But then the Zebus aren't nearly as fine as we are. And only one Zebu arrives at a time, as a rule. Think of having only one child arrive at a time."

"I can't think of it, for I always have two precious aoudads at once."

"Haven't the Zebu children ever any twin brothers or sisters?" asked one of the Aoudad children.

"There are a few who have, but it doesn't often happen," answered Mother Aoudad.

Now the Aoudads are wild mountain sheep and they had a bad reputation here of being cross, although they were beautiful with their long manes of wool and their handsome horns.

"Children," said their mother, "I must tell you some of the ways of aoudads. You, my daughter, must always let your brother and father eat first. If you don't let them, they will shove you aside and do it any- way. And, daughter, remember we are one of the few animal families where the daughters and mothers are more gentle than the fathers and brothers."

"The lioness is wilder than the lion, the tigress is wilder than the tiger, but Mrs. Aoudad is gentle and tame compared to Mr. Aoudad, who has everything his own way, always."

"My son will be like that, and my daughter will be gentle and will put up with it, as she will put up with it when she has a mate."

"But none of us complain of the weather, though it is so different from the hot, dry climate of northern Africa where our family lives."

"Such are the ways of aoudads, my two young children."

Forestalled Her Aunt

When Patricia is naughty, her aunt sometimes says, "Why, Pattie, aunt is just ashamed of you!"

The other day Pattie committed some slight misdemeanor. Running to aunt, she forestalled her, thus, "Oh, Nanna, I'm jus' as ashamed of me as you are!"

Gentleman Is Defined

Mister—Can you tell me what a gentleman is, little boy?

Little Boy—Yes, sir; he's a grown-up boy that used to mind his mother.

WRIGLEY'S

still quenches thirst, cools the parched throat and by its delightful flavor and refreshment restores the joy of life.

Nothing else can give you so much enjoyment for so little.

Remember Wrigley's After Every Meal

W. N. U., San Francisco, No. 39—1926.

Peru Favors American

The government of Peru has set aside one of its strictest regulations in favor of an American scientist, Dr. Alfred L. Kroeber of the University of California, who will be permitted to bring to this country relics of the ancient Inca civilization uncovered by an exploring expedition in which he will have the co-operation of Peruvian scientists. A special decree was necessary to suspend the usual provision that archeological objects shall not be exported from the country.

Careful as to Detail

Customer—Two eggs poached medium soft, buttered toast not too hard, coffee not too much cream in it.

Waiter—Yes, sir. Would you like any special design on the dishes?—Weekly Scotsman, Edinburgh.

Ananias was about as famous for one lie as Baron Munchausen was for a bookful. Such is art.

Dependable

The greatest thing about a Ford is the way it keeps going, even under the worst conditions. The dependability of Champion Spark Plugs—which have been standard Ford equipment for 14 years—is an integral part of Ford dependability.

CHAMPION

Dependable for Every Engine Toledo, Ohio

Useful Hammer

If you are the handy man of the family you'll welcome a nail-holding hammer especially designed for driving nails into awkward places. The nail is slipped in a groove in the top of the hammer and held tight in place by two projections operated by springs. One blow of the hammer starts the nail, after which the hammer can be pulled away.—Popular Science Monthly.

Produces Much Energy

Department of the Interior figures show that in 1925 public utility power plants in the United States produced nearly 66,000,000,000 kilowatt-hours of electric energy.

Moral: Never Pet Strange Black Cat

Two girls of the flapper type and their boy friend were motoring near Goshen not long ago when one of the girls uttered a scream.

"There went a black cat across the road," she cried, "and now we'll have some kind of bad luck."

Whereupon the other girl announced a new angle to an old tradition. Somebody had told her that if the cat should be captured the jinx would be broken. Well, the cat was sitting by the roadside not far away. It seemed to be gentle and mild mannered. With one accord they climbed out of the car and started in the general direction of the kitty. They smiled at the kitty and spoke to it in dulcet tones. Then they made a rush to see which could catch it first.

(The curtain will be lowered a moment to denote the passing of a considerable period of time.)

After the boy friend had taken the girls to their homes, he went out and buried his clothes. The black cat was a skunk.—Indianapolis News.

Age of Luxuries

Not to be entirely outdone by reports of purchases of solid gold dinner plates at very high prices, a special order has just been placed in New York by a certain woman for teaspoons of the solid metal at \$500 a dozen. In another case an order has been sent in to a well-known concern in New York calling for six fancy goblets wrought in solid gold. Just what they will cost the purchaser was not known, as the price had not been calculated for the style of goblet wanted. That this is a minor factor in the transaction, however, is indicated by the fact that the order was "signed, sealed and delivered" by the purchaser on the assurance of the selling house that it could be executed as desired.

Woman Smokers Afflicted

Dr. Herman Prinz, professor of therapeutics at the University of Pennsylvania, says that in some parts of the Orient, where women smoke more even than the men do, they are great sufferers from cancer of the mouth. Fifty per cent of the cases of cancer of the mouth, he maintains, is caused by the use of tobacco.

In Norway more than 1,000 water power plants are being used for the production of more than 1,800,000 electric horsepower.

Too Much "Acid?"

Excess Uric Acid Gives Rise to Many Unpleasant Troubles.

AUTHORITIES agree that an excess of uric acid is primarily due to faulty kidney action. Retention of this toxic material often makes its presence felt by sore, painful joints, a tired, languid feeling and, sometimes, toxic backache and headache. That the kidneys are not functioning right is often shown by scanty or burning passage of secretions. Thousands assist their kidneys at such times by the use of Doan's Pills—a stimulant diuretic. Doan's are recommended by many local people. Ask your neighbor!

DOAN'S PILLS

Stimulant Diuretic to the Kidneys Foster-Milburn Co., Mfg. Chemists, Buffalo, N. Y.

haarlem oil has been a world-wide remedy for kidney, liver and bladder disorders, rheumatism, lumbago and uric acid conditions.

GOLD MEDAL HAARLEM OIL CAPSULES

correct internal troubles, stimulate vital organs. Three sizes. All druggists. Insist on the original genuine GOLD MEDAL.

Foiling Forgers

A quartz lamp is used by experts in Hanau, Germany, by which counterfeit bank notes, fake pearls and the faintest shades of ink may be detected. The apparatus, by means of ultra-violet rays, discloses the most subtle falsification; whose detection hitherto depended on microscopic investigation and complicated chemical analysis.

Making Haste

Husband—I hope you will hurry with your dressing, or we shall be late for the opera.
Wife—Hurry? Why, what else have I been doing for the last two hours.—Kasper, Stockholm.

BODY BY FISHER—SYMBOL OF THE BEST

Fisher Bodies are the choice of the foremost car designers and manufacturers—proved by their adoption, exclusively, for all General Motors cars.

Only in Bodies by Fisher can the builders of Cadillac, Buick, Chevrolet, Oakland, Oldsmobile and Pontiac cars find the skill in design

and construction which makes their products instantly pre-eminent.

And long experience has taught you, as it has shown the industry's greatest engineers that, the hallmark of the best is the emblem—Body by Fisher.

Best because safest, most beautiful, most comfortable, most convenient, most luxurious—in all price classes.

DEMAND FOR AUTO
GAINING IN ALASKA

A growing demand for automobiles in the territory of Alaska was indicated recently by a report showing that sixty-seven cars have been received for shipment at Seward so far this year. Shipments of motor vehicles include forty-seven automobiles, five trucks and fifteen truck chassis.

MISS A. ANDERSON
ENGAGED TO DENTIST

Dealers in smoked glasses are noticing a sudden rise in business as the result of an epidemic of eyestrain among Jefferson students. This malady is attributed to the dazzling stone which Miss Agnes Anderson has been wearing on her left hand.

The lucky man is Dr. J. Cambell, dentist at Lane hospital. As to the date of the happy event—well, that is still a mystery.

TEACHERS HONORED
AT P. T. A. RECEPTION

Several parents have responded to invitations for the teachers' reception to be held at the regular meeting of the P. T. A. next Monday evening.

After a short meeting at 6:30 o'clock, the teachers will be guests at the first dinner of the association. Following this, a program will be given.

The purpose of this event is to promote friendship and understanding between the parents and teachers.

JEFFERSON'S TEAM
DOWNS POTTER HIGH
12-0 LAST FRIDAY

Jeffersonians are looking at the football season through rose colored glasses, as a result of the 12 to 0 victory last Friday over Potter.

Against a much heavier team and one that last year fought the Lick Tigers to a standstill, the Indians put up a winning fight to win by two touchdowns.

Potter won the toss and kicked off to Jefferson's 20-yard line. The first quarter was the only one in which the Black and White threatened to score, their fullback making continual gains off tackle until he was finally stopped and the Indians took the aggressive.

Dave Gehring drew first blood for the Purple and Gold when he plunged through the center of the Potter line for a touchdown just as the whistle blew ending the half.

In the last quarter the home team brought the ball almost to the goal but Potter's line held at this point and they lost the ball on downs. Potter kicked, and Charlie Aiello received the ball on their 40-yard line and ran through their entire team to score the second and last touchdown of the day.

The first central telephone office in Washington, D. C., was opened on December 1, 1878.

At the beginning of the present year the United States had fifteen telephones per 100 population while Europe had less than two.

TO MEN OF VISION
COLMA ACRES
SPELLS OPPORTUNITY

He knows that thousands of acres of land formerly used to supply the necessity of life to the people of a rapidly growing city are being taken over for industrial sites, golf courses, parks and sub-divisions.

He knows that the gardener and the nurseryman are being shoved back, increasing the haul and making it difficult for him to compete with those more happily situated.

He must realize that a few acres near a great highway within thirty minutes of the commercial district will make him independent.

Rich soil, water in abundance, magnificent view, of such are Colma Acres.

Our selling plan places this opportunity within the reach of every man possessed of the earnest desire to better his own condition.

LANG REALTY CO.
